

Walther LP400 „5D“

Successful sport shooters choose WALTHER. They prize the optimum grip position of these match air pistols, because they know that the grip position is crucial for every tenth of a ring – and hence for winning gold. Now the Walther air pistol top model LP400 starts to the “fifth dimension”. As often requested, the current LP400 is now available with the exclusive adjustment of the grip width „5D“ known from the LP300.

LP400 Configuration:

- Compressed air system 200 bar
- EQUALIZER magnetic absorber
- RESORBER double compensator
- Pressure reducer with QUICKCLEAN air filter
- ECO valve technology
- Breech for easy reloading
- Dry-practice mode
- Ball bearing VARIO trigger with maximum setting options
- SLIMLINE aluminium cylinder with pressure gauge
- Sights adjustable in the longitudinal direction
- Universal tool and plastic gun case

5D grip adjustment:

- Infinitely variable grip volume
- Grip width also asymmetrical individually adjustable via three points of support
- Antimicrobial coating
